August 26, 2024

To Interested Parties:

The meeting that is set to be held at 12:00 pm August 27, 2024, will be conducted as a panel and workshop meeting. The workshop will be held entirely by Zoom. While public participation is always encouraged, and attending in person at the wastewater treatment plant office is an option, we have limited technological resources available. We believe participants will get the most out of the meeting by attending via Zoom. If you have any questions, feel free to contact us.
